

E-Panthen

Moisturizing Cream · 40 g

A concentrated barrier-repair moisturizer: 5% D-panthenol with vitamin E, ceramide and natural oils for dry, rough and irritated intact skin.

5% D-Panthenol · + Vitamin E · + Ceramide · Face & body

5%
D-Panthenol
Provitamin B5 — hydration & barrier repair

1%
Ceramide
Restores the lipid barrier

10
Skin-care actives
Oils, butters and humectants

SCIENTIFIC RATIONALE

- **D-Panthenol 5%**
  Converted in the skin to pantothenic acid (part of coenzyme A); increases stratum-corneum hydration and reduces water loss.[1,2]
- **Vitamin E**
  The skin's major lipophilic antioxidant, protecting barrier lipids from oxidative stress (e.g. UV).[4]
- **Almond 3% · Shea · Argan · Wheat germ**
  Emollient oils and butters that soften and nourish dry skin.
- **Ceramide 1%**
  Ceramides are the main lipids of the stratum-corneum barrier; replenishing them helps restore barrier function.[3]
- **Allantoin 1% · Glycerin 2%**
  Allantoin soothes and smooths rough skin; glycerin is a humectant that binds water.
- **Dimethicone**
  Light occlusive film that reduces water loss without a greasy feel.

CLINICAL EVIDENCE ON THE INGREDIENTS

Dexpanthenol & barrier[1] Gehring & Gloor, 2000 · RCT	Double-blind, vehicle-controlled human study · topical dexpanthenol for 1 week → **increased stratum-corneum hydration** and **reduced transepidermal water loss** vs vehicle.
Dexpanthenol review[2] Proksch, 2017	70 years of clinical use: established as a **moisturizer, skin-barrier restorer** and aid to healing of irritated skin; modulates wound-healing gene expression.
Ceramides[3] Coderch, 2003 · Am J Clin Dermatol	Topical ceramide-containing lipids help **repair the barrier** and improve dry, compromised skin.

RECOMMENDED FOR

Dry & rough skin · Hands, elbows & feet · Redness after sun exposure · Pressure marks · Mild superficial burns · Pairs with Octo for scalp-skin care

Apply 1–2 times daily or as needed — Massage gently into clean skin
